operations:

The above will be seen to consist of a 5-letter common noun preceded by an unpronounceable digraph. We have been forced to adopt this cumbersome system because another part of our organization has already preempted Webster's Unabridged Dictionary. In cable communications the digraph should be rendered by the phonetic alphabet. Thus, BGABUSE would be rendered BAKER GEORGE ABUSE; HTADDER would appear as HOW TARE ADDER, etc.

3. We will send you additional blocks of pseudonyms and cryptonyms in such amounts and at such times as you may request. Names of current projects are presently being revised. We will inform you of new names as soon as list is completed.
